Cranked amps aren't really a significant part of Jack's sound, as he always used a pedal to boost his signal.. One of the biggest additions to the Jack White gear page was the segmentation of pedalboards by band.. For the latter, it seems that he has used the original Electro-Harmonix POG, now out of production, though has switched to the Micro-POG.. Now, Dunlop has shared a video of Clark discussing the signature pedal, which features a lower frequency range and a tighter sweep, the latter ideal for, as Clark puts it, “percussive situations.. His set-up tends to change between bands, though even then it tends to be just a the addition of a few pedals.
