Though this issue has been discussed on the VMware Community Discussion forum for VMware Player since the release, and attempts have been made to inform VMware through tech support and other means, VMware has not yet corrected this glaring omission.. I can run multiple platforms and test things in a safe sandbox environment and under a wide variety of configurations without having to worry about having to rebuild my laptop every time something goes wrong.. Updated on Jun 6, 2012 I can even take copies of virtual machines created at work to run on my computers in order to test new configurations without killing the live servers.. The software has never let me down and it just makes it so easy to install and reconfigure different machines.
